

# HELP REDUCE CO<sub>2</sub> IN YOUR DWELLINGS

CO<sub>2</sub> is a naturally occurring, odourless colourless greenhouse gas. We all know it has an impact on our environment but not everybody realises its effects on human health.

### THE SOLUTION

Lo-Carbon Sentinel Multivent/  
Plus HX CO<sub>2</sub>

- Continuous ventilation with CO<sub>2</sub> sensing and control abilities can help to maintain a healthy indoor space
- The Lo-Carbon Sentinel Multivent/Plus HX CO<sub>2</sub> will boost when CO<sub>2</sub> levels reach a 1000 PPM (adjustable) or purge when 1500 PPM is reached to ensure a constant good indoor air environment free from excess CO<sub>2</sub> levels.
- The Home Quality Mark gives credits for ventilation controlled via occupancy
